Eventact

Custom Font

To use a custom font file, you need to have a URL to the font file

For example:

https://assets-marketing-site.calendly.com/static/Gilroy-Regulare25ee40195da6f33618ba7c03d2b66a4.woff2

Go to the project -> Design -> Colors, Fonts

In the Fonts section – change the font type to WOFF

In the Font, Name field enter the font URL

You can leave the title font name empty or paste a different URL for the title font.

Eventact

How to get a URL for the font file

Open your website with a browser (Chrome)

Click F12 and go to the Fonts tab.

Reload the website

You will see a list of font URLs used in the website.

Right-click on the font name and select Copy -> Copy link address.

Paste this URL in a text editor.
